Place of Residence: Berlin, Germany
Visa: Chancenkarte - Opportunity Card
Availability: Immediate Joiner

Kurzprofil

QA Automation Engineer with 8+ years of experience building and owning test automation frameworks, quality strategies, and AI/LLM evaluation solutions across Healthcare, Banking etc. Hands-on expertise in Playwright, Cypress, TypeScript, JavaScript, API automation, Page Object Model (POM), exploratory/manual testing, and CI/CD. Experienced in shift-left quality engineering, edge-case analysis, release validation and mentoring teams. Proven track record of building automation from the ground up, improving regression and applying AI/LLM evaluation techniques to validate correctness, relevance, and hallucinations.

Currently seeking QA, SDET, Senior QA Engineer or similar roles in Germany.

Berufserfahrung

05/2021 – 09/2026

Senior QA Automation Engineer (QA Lead)

Optum Global Solutions, Remote

- Owned end-to-end quality and test automation strategy for the Datacore Risk Adjustment platform, partnering with distributed engineering teams across time zones.
- Designed and implemented a Playwright and TypeScript-based automation approach using reusable Page Object Model (POM) patterns, scalable test architecture, and parallel execution to improve maintainability and regression coverage.
- Applied shift-left testing by reviewing requirements, acceptance criteria, testability, edge cases, and potential failure scenarios early in the development lifecycle.
- Led exploratory, manual, and release testing for complex workflows, complementing automated coverage and ensuring production-ready releases.
- Automated data validation pipelines in Azure Databricks using Python and validated application data, replacing manual reconciliation.
- Implemented AI/ML-assisted validation using Tesseract OCR and TensorFlow to automate validation of BI dashboard data, PDF logos, and application charts.
- Built and maintained GitHub Actions CI/CD quality gates with automated test execution, enabling continuous delivery and proactive regression detection.
- Applied Claude and GitHub Copilot in test development to accelerate test-case generation and improve automation productivity.
- Implemented AI testing strategies using DeepEval, LangSmith, and RAG evaluation frameworks to assess answer correctness, hallucination detection, relevance, faithfulness etc.
- Mentored QA engineers on automation practices, code quality, debugging, and reusable testing patterns; promoted shared ownership of quality across engineering teams.

04/2020 – 05/2021

Associate Consultant

GlobalLogic, India

- Enhanced a Cypress-based UI automation suite using JavaScript and Page Object Model patterns, improving execution stability and reducing test flakiness.
- Designed reusable Cypress automation components and expanded automated coverage for complex workflow.
- Architected a robust GitLab CI/CD pipeline integrating automated tests for high-confidence release.
- Integrated API automation with microservices and established JIRA-based release-cycle.
- Collaborated with developers, architects, and product owners during requirements refinement, defect triage, and release planning to improve testability and quality.

07/2019 – 04/2020

Test Designer

Natwest Markets, India

- Tested mission-critical trading workflows for Bonds, Certificates of Deposit (CD), and Commercial Papers (CP), ensuring regulatory compliance and integration accuracy across transaction systems.
- Implemented automation for a desktop-based Bloomberg trading system using Coded UI and C#.
- Collaborated with business analysts and traders to validate pricing, booking rules, and regulatory workflows.
- Developed a UI Path proof-of-concept (POC) to automate trader workflows, demonstrating RPA feasibility in a financial trading environment.

03/2018 – 07/2019

Senior Test Engineer

GlobalLogic, India

- Led end-to-end testing of Hilti's ONTrack platform; built UI automation framework from scratch using Java, Selenium, Cucumber BDD, TestNG, and JUnit.
- Designed and executed microservice API testing strategies using Rest Assured, covering both positive and negative test scenarios.
- Integrated test suites with Jenkins, Maven, enabling automated builds and headless execution in CI.
- Worked on-site at Schaan, Liechtenstein for Hilti, gaining direct client exposure and international collaboration experience.

Ausbildung

08/2009 – 06/2013

Bachelor of Technology (B.Tech)

Uttar Pradesh Technical University, India

Kenntnisse & Sprachen

Test Automation:	Playwright, Cypress, Selenium, Page Object Model (POM), TestNG, JUnit, Cucumber BDD
Programming Languages:	TypeScript, JavaScript, Java, Python
API & Integration Testing:	REST, Postman, Rest Assured, Microservices Testing, GitHub Actions, Jenkins, GitLab CI, Docker, Kubernetes, Maven, NPM
Databases & Cloud:	Azure Cosmos DB (NoSQL), Azure Databricks, Microsoft Azure, PostgreSQL
AI/ML in Testing:	Tesseract OCR, TensorFlow, GAN-based Test Data Generation, DeepEval, LangSmith, Ragas, RAG Evaluation
Quality Engineering:	Exploratory Testing, Manual Testing, Release Testing, Shift-Left Testing, Risk-Based Testing, Edge-Case Analysis
Monitoring & Reporting:	Datadog, Kibana, Tableau, Power BI
Project Management:	JIRA, Rally, Scrum, Kanban
Sprachen:	English (C1 - Fließend), Hindi (Muttersprache)

Berufliche Erfolge

- GlobalLogic Engineering Excellence Award- recognized for outstanding contribution to quality engineering.
- Reduced regression execution time by 70% by implementing parallel test execution in Cypress framework.
- First to integrate ML-based visual validation (Tesseract OCR + TensorFlow) into Cypress at Optum, enabling automated BI dashboard testing.
- Developed enterprise wide API and UI Testing Best Practices framework, standardizing quality across multiple teams.
